Subject: Inspection of 3 placer claim project areas

Tony:

Attached are the cover sheets to three Oct. 2, 1998 inspections of the unreclaimed placer operation disturbances along the Green River (Hiko Bell's, Norm Haslem's, and Bluebell's; UTU 66354, 66357, and 66358). I will try to send along an extra set of prints from the inspection. For your information, letters which were sent to the operators are also attached.

I wanted to particularly let you know that the vacant wooden structure on the Bluebell project area contains a lot of rodent droppings, a possible source of hanta virus.
